Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Applicants might want to remove the word "copolymer" from "copolymer B" from line 9 of claim 1 since "B" is a block not a block copolymer.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toshinori (JP 03-070761), newly cited by applicants, optionally in view of Dekking et al. (US 3,661,620).

Patentees disclose a composition containing a block copolymer and a thermoplastic (Abstract) in a ratio of 5:95 to 95:5 also containing a softener at a level of 40-80 parts based on 100 parts of thermoplastic and block copolymer (page 7, of the Japanese language patent; see also the first complete paragraphs on pages 22 and 23 of the translation). The thermoplastic may be polymethyl methacrylate (page 6 of the Japanese language patent as well as page 19, line 6 of the translation).

There are no specific examples in which all of applicants materials are present in combination in applicants amounts. However, it would have been obvious to a practitioner having an ordinary skill in the art at the time of the invention to arrive at applicants invention by selecting from the various disclosures of the patent in the expectation of adequate results. With regard to applicants abrasion characteristic, since

the material of patentees and applicants are similar, similar or identical characteristics would be expected to be inherent.. In any case Dekking at column 1, lines 10-15 discloses that it is common in the art to improve abrasion resistance of thermoplastics. Hence it would have been obvious to a practitioner having an ordinary skill in the art at the time of the invention to provide applicants abrasion resistance to the primary reference since the secondary reference discloses that high abrasion resistance is desirable absent any showing of surprising and unexpected results. The above rejection relies on a reference newly submitted with a 1.17(p) fee and this Office action accordingly can be made FINAL, MPEP 716.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Jeffrey C. Mullis at telephone number 571 272 1075.
